

[Keygen Vault Workgroup Land Desktop 2010 32 Bit](#)

A screenshot of the Azure portal interface. The top header shows the breadcrumb "apim-we-retrieve-key-vault-secrets-with-msi - Managed identities" and "API Management service". On the left, a navigation pane lists various categories: "API Management" (with sub-items: Quickstart, APIs, Products, Named values, Tags, Subscriptions), "Security" (with sub-items: OAuth 2.0, OpenID Connect, Certificates), "Settings" (with sub-items: Properties, External cache, Protocol settings, Custom domains, Managed identities), and "Locks". The "Managed identities" item in the "Settings" section is highlighted with a red box. The main content area is titled "System assigned" and contains a paragraph explaining that a system assigned managed identity enables Azure resources to authenticate to cloud services. Below the text are buttons for "Save", "Discard", "Refresh", and "Got feedback?". At the bottom of the main content area, there is a "Status" section with a toggle switch. The "Status" label has an information icon. The toggle switch is currently in the "On" position, which is highlighted with a red box.
